## Glass Filler for Plastics

---

TOMATEC's glass filler for artificial marble (solid surface) is the result of applying our frit technology to plastics. It is used in bathtubs, washstands and so on, due to its translucency controlled by the refractive indexes of frit to match with that of resin and superior hot water resistance. We expect its field of applications to be widened in the future by combining organic materials and frit technology.

Applications : Bathtub, washstand, BMC for counters, kitchen tops, interior panels, interior products

Item Code	<b>M-80-S</b>
Specific gravity	2.58
Refractive index	1.55
Particle size	42-200mesh 40% Less than 200mesh 60%
Glass Composition	SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> -CaO
Softening point	>500°C(932°F)

\*The above values are representative values.
